

Large format ISIS support

EDM, EDC and ECM applications

Technical documents on-site

Quickly retrieve data

Colortrac SmartLF

ISIS

Professional SmartLF Scanning Solutions for:
EDM | EDC | ECM | Technical & CAD Documents
Archiving | Manufacturing

- ▶ All Colortrac SmartLF large format scanners support ISIS, (Image and Scanner Interface Specifications), the basis for the ISO 14984 public domain standard for Scanners in Document Imaging Systems.
- ▶ ISIS-certified hardware is tested for compliance with the ISIS standard by EMC Captiva, the specifier and regulator of the ISIS standard. This ensures problem-free data exchange between ISIS hardware and software.

The only ISIS certified large format scanner, the SmartLF Ci 40.

- ▶ The SmartLF Ci 40e BERTL 4.5 Star "OUTSTANDING" award winning technical document scanner (*above*) has a certified ISIS driver. All other SmartLF scanners are ISIS compatible but are not yet certified. They work reliably with all ISIS-compliant EDM programs.
- ▶ Only SmartLF large format scanners can scan and save large format documents in ISIS-compliant EDM software. Colortrac's ISIS support ensures exceptional high quality ISIS scans from every SmartLF scanner.
- ▶ Unlike ISIS, TWAIN is not tested for compliance by a regulating authority. All applications that support TWAIN interpret it differently. This results in widespread incompatibility issues.

Only Colortrac large format scanners support ISIS

The multi-award winning SmartLF Gx+ 42 large format scanner working with Kofax Ascent Capture via ISIS driver.

If you already use ISIS software, you know how to scan large format documents with an award-winning Colortrac SmartLF!

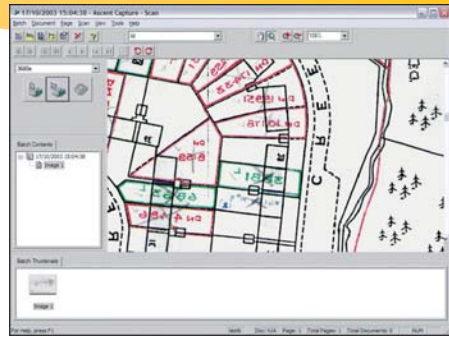

ISIS provides a consistent and proven scanning interface regardless of what image capture software you are using

If you use ISIS-compliant software, like Kofax Ascent Capture, Captiva QuickScan Pro or InputAccel, Laserfiche Rio, etc., to capture office documents, then you already know how to scan large format drawings with a Colortrac SmartLF scanner. Its familiar ISIS interface will rapidly accelerate your transition from small to large format document capture.

Colortrac SmartLF scanners are the first and only large format scanners to support the ISIS standard. Our EMC Captiva-approved ISIS driver lets you take full advantage of the power and precision of the SmartLF Ci 40e scanner to quickly and easily scan and save large format documents, technical drawings and maps in color, grayscale and or monochrome from within your preferred EDM software.

If you already use ISIS-supporting software, SmartLF scanners will add large format benefits to your EDM processes - with no need to learn new software and new ways of doing things. Simply start to scan large format forms and documents as you always do using the familiar ISIS interface, then quickly, easily and seamlessly integrate them into your preferred EDM software.

ISIS - ensuring you, your EDM software and your SmartLF scan in harmony!

Scan using a familiar ISIS interface, like Kofax Ascent Capture, (above).

Increase productivity and efficiency in wide format document management with ISIS and a SmartLF scanner

ISIS is the standard interface for capturing office documents using small format scanners in EDM (electronic document management) applications. Colortrac is the only large format scanner manufacturer to support the ISIS standard. It developed its unique ISIS driver to give EDM users a quick and easy route up to large format scanning.

Over 300 imaging applications now support the ISIS standard. All offer a familiar interface which lets ISIS users start sooner and become productive more quickly.

As you already know how to use your EDM software, there's little or no need for costly training. If you already use ISIS in an EDM program, our SmartLF ISIS driver's familiar look and feel will get you productively scanning large format drawings into your preferred EDM application, the one you already own and use, in no time at all.

For users of electronic content management systems in large company departments or small to mid-size businesses, a SmartLF ISIS-driven scanner is the best way to speed up the automation of large format document capture. Our ISIS driver simplifies the capture process and assists in seamlessly transforming your scanned data into business-ready digital content. ISIS reduces operating costs, increases data accuracy and accelerates business processes. By simplifying the capture process for indexing your critical data, ISIS makes you more productive because your enterprise applications get to process greater volumes of higher quality digital content faster.

Large format EDM scanning is only more productive with ISIS - and a SmartLF scanner.

ISIS - ensuring you, your EDM software and your SmartLF scan in harmony!

Some user comments:

Capita Contact and Document Services is a leading UK provider of business support services with a strong focus on electronic mailroom and document management solutions. "We looked at several large format scanners and eventually chose a SmartLF out-of-the box solution. Colortrac supplied us with an ISIS® specification driver so we could integrate the SmartLF with our document management system. Colortrac is recognized as a leader in the A0 market and the SmartLF is an effective and affordable solution." **Anthony Lamb, Scanning Project Manager, Capita Contact and Document Services.**

The London-based **Filing Plus Group plc** provides document scanning, relocation, archiving, consultancy services and record management solutions to a wide range of clients. "Colortrac was the only company that could supply a driver designed to meet the ISIS interface specifications for an A0 scanner. Colortrac's ISIS driver allowed us to integrate our SmartLF scanner directly with our Kofax Ascent Capture system." **Ryan Heiser, IT Manager / IT Analyst, The Filing Plus Group plc.**

Responsible for administering over 60 schools, the **Calcasieu Parish School Board** is based in Lake Charles, Louisiana, USA. "A SmartLF scanner was purchased for our school district to scan plant maps, old oversized board documents and election districts for our board members, as well as many other documents. Colortrac sent us the ISIS driver - documents scan into Laserfiche just as easily as any other scanner we have. Our SmartLF with ISIS driver definitely does the trick." **Joe Feucht, Purchasing Supervisor, Calcasieu Parish School System.**
